Ciao, from Teporia.

/te'p-o:ria/

It is pronounced tepòria.
 It comes from the Italian
 word "tepore": Cozy heat and
 a pleasant, slightly breezy climate.
 We imagined a home like this.
 Or rather, outside the home.

We are an Italian start up ready to bring the home outside.

Why? Well, because we believe
outdoor living helps us become
the best version of ourselves
and enjoy life. Don't you agree?

We design and sell statement-making outdoor furniture, pursuing the values of **Beauty, Pleasure and Openness.**

Our values give shape to a warm and embracing **open-air vision.**

Now, as always, ready to get a contemporary classic.

We believe that following the evolving subject of the contemporary way of living is one of our main skills.

Our goal is to keep pace with new ways of shopping, as much as to live the outdoors in a world open to adventure.

Outdoor living is living at its best

Imagine being outside, on a warm June day. This is our state of mind.

Life is slower and the breaks are longer.
All the senses wide open.

There's no place like outdoors

Can you feel it?

Beauty

A creative force
for self-expression.

So many things in the outdoors speak of Beauty.

We believe in Beauty: a creative force that allows us to express ourselves and design products that people can identify with and love for decades.

We respect tradition and its essential forms. Let's return to the Mediterranean, to its atmospheres and its colors. We combine eclecticism with functionality.

We work with Italian designers to create style statements for modern life.

A team of designers
and a challenge: to become
**new interpreters of the
Italian outdoor culture.**

Margherita Rui

Linked to the Italian tradition,
connected to the needs of our time.
**Under the artistic direction
of Margherita Rui, we want
to convey our style and
culture, filtered through
a new and cosmopolitan vision.**

Andrea Radice

Pleasure

The art of living
in the moment.

Staying "al fresco" is a state of mind.

It doesn't matter whether
in a huge garden or on a city terrace.
this is what makes us enjoy every
single carefree moment.

Early morning coffee?
A family dinner? Let's live it outdoors.

Openness

Express yourself
through design.

Good products at a lower price. Hurray!

Design must be accessible. Believing in this principle, we have chosen to rethink our value chain, selling only online and keeping distribution costs to a minimum.

Teporia is a daily escape space: always accessible, always reachable, just a click away.

Our Collections

Six collections
Five Italian design
signatures.

Fune Collection

design Andrea Radice

The Fune collection plays with weaving to its maximum expression. From its aluminum structure to its upholstered backrest.

The family

Fune has been designed for both the dining area or the lounge area, and is available in two sets with different sizes and designs, both of which can be combined with a series of tables.

Curved line comfort

The structure is made of painted aluminum tubes: solid and at the same time extremely light. The cushions are padded and permeable so as to offer even more satisfying comfort.

Dialogue with nature

The shades evoke the warmth of the earth. The aluminum structure is combined tone-on-tone with the fabrics and bindings.

Fune Collection

Brand Book 2024

Twists of rope stretched out
in the sun and the vitality of the air

Juta Collection

design by e-ggs

Soft, sweet and sinuous:
Juta starts from the idea
of an upholstered seat
suspended from a metal frame.

Ancient weavings

Entirely woven by hand, in addition to its aesthetic character, the rope bestows softness and lightness. Juta is welcoming, but also light: it can be easily moved from one part of the garden to another.

Designed on the body

The rope is woven directly into the structure and shaped into organic curves that accommodate the body in relaxing positions. The round tube that forms the sled design gives Juta a further element of style.

The power of color

Juta is available in four color variations: ranging from more natural shades to brighter and more decisive ones for an even more iconic style.

Nesto Collection

design by Tommaso Caldera

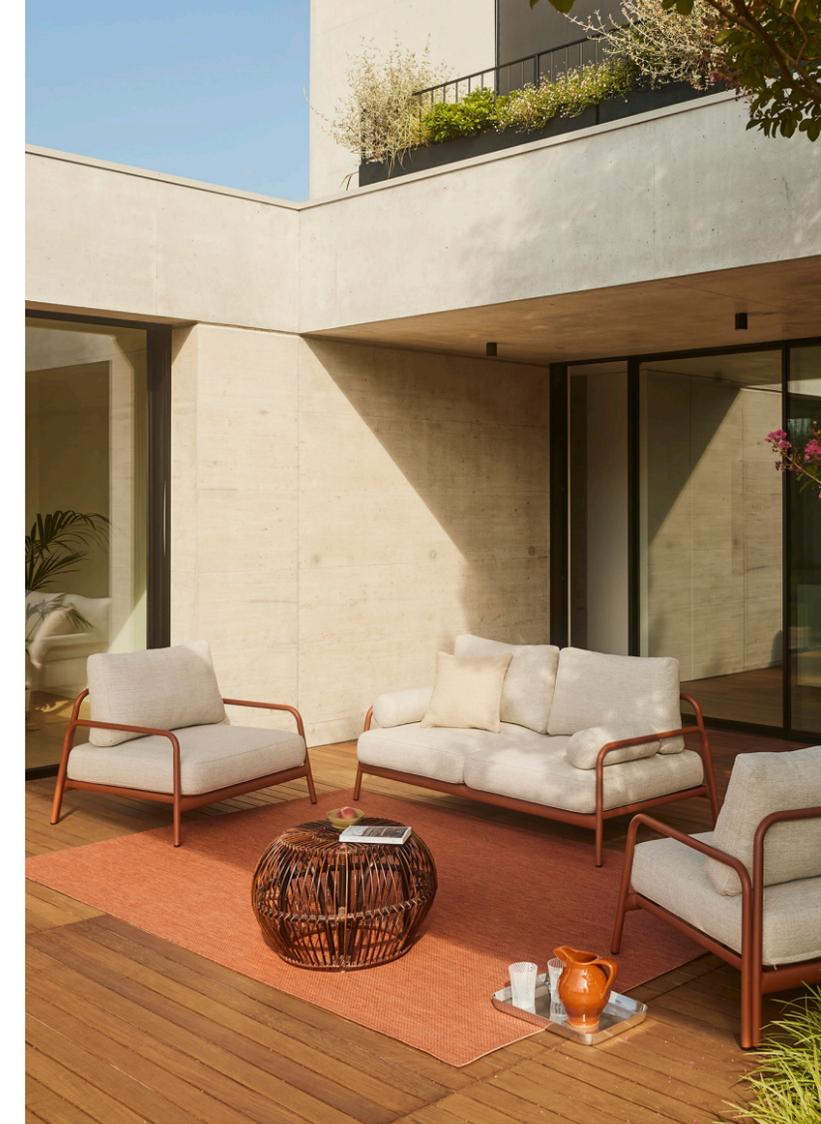

Created for the outdoors but also perfect indoors: the Nesto collection has a **strong, decisive identity which characterizes any space.**

The family

Sofa, armchair, coffee table for the lounge area, sun beds for the poolside area. Beautiful and distinctive together, their individual personality and style also stands out.

Refined design

The dominant structure is made of metal tubes that start together at ground level and then fork at different points, depending on the product. A highly-resistant elliptical structure is grafted onto the tubulars, reinforcing the geometry of the design.

TEPORIA

Nesto Collection

Rada Collection

design by Margherita Rui

A living room without walls:
the Rada collection reinvents
outdoor space as if it were
another room in the house.

TEFORIA

Rada Collection

The configurable space

Named after the natural inlet that shelters ships, Rada takes up its welcoming shape. The modular design of the sofa, iconic element of the collection, offers the possibility to configure the outdoor space for different social situations, just like in a real lounge area.

Weave and weft

The weave on the backrests of the sofas and armchairs recalls the play of warp and weft of a strip of soft fabric.

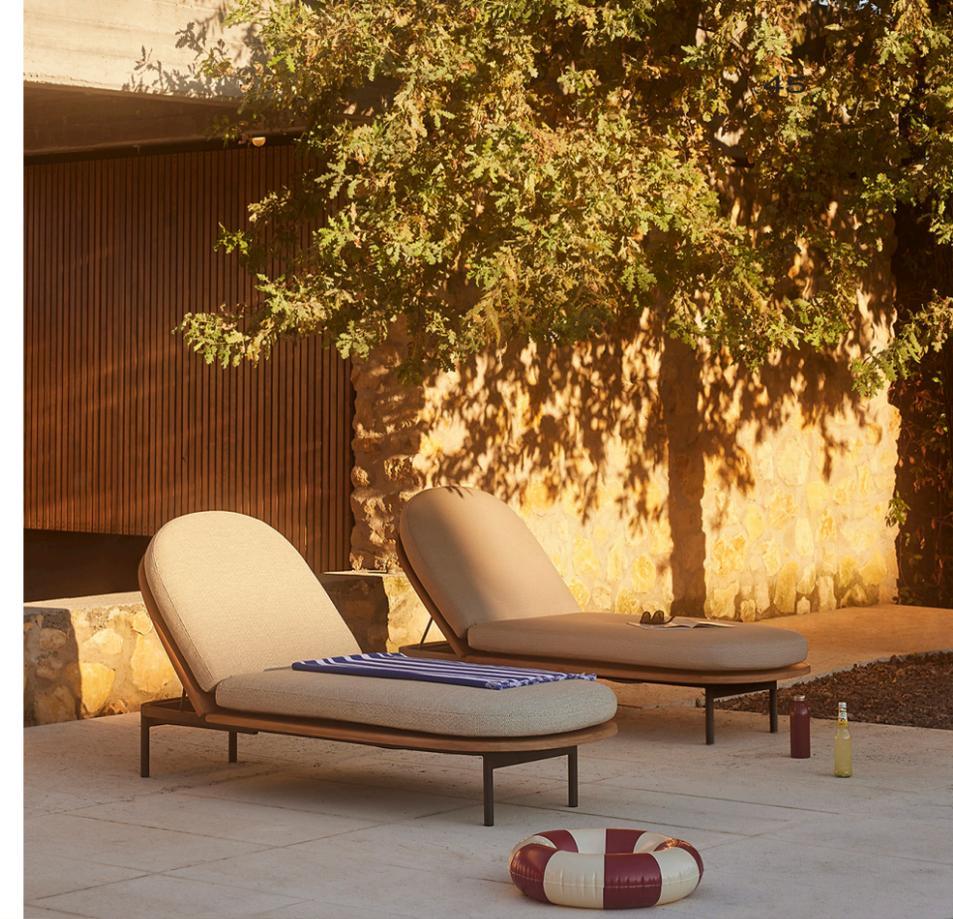

Rada is an embrace: generous, reassuring and welcoming.

Generous design

The collection is made up of lounge and dining area sets, and sun beds. A generous character runs through the entire line, highlighted by the dimensions, depth and softness of the upholstery.

A warm mix of finishes

There are different combinations of materials: teak base and surface tops, aluminum structure softened by a weave in the backrest of the sofas and by a layer of padding in the seats of the dining area.

Sartia Collection

design by They Simply Design

The Sartia collection was created with the aim of **giving everyone the opportunity to reinvent outdoor space in style**, whatever it may be.

Recreate your own space

Aluminum table and chairs in aluminum and woven rope. The table can be extended and the chairs are easily stackable. Ease and simplicity are the basic qualities of Sartia.

Amidst comfort and style

Woven rope forms the seats and backrests favoring ergonomics, while lending character to the design, which is also marked by the three color variations on offer.

Modern simplicity

Its clean design makes Sartia perfectly adaptable to different spaces and moments: to be enjoyed as a couple, as a family, among groups of friends.

Tamerice Collection

design by e-ggs

Elegant, classic and timeless:
the imperturbable world
of seafront tamarisks comes
to life in the Tamerice collection.

TEPORIA

Tamerice Collection

Dining and Lounge

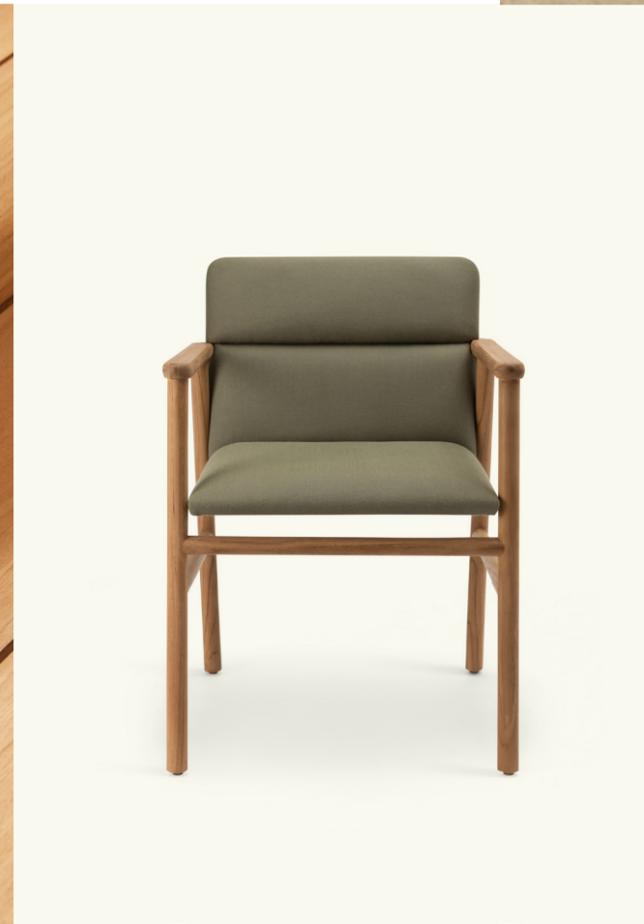

The Tamerice collection is made up of dining and lounge area sets. Made entirely of solid Teak wood, the sofas, chairs and lounge chair are padded and covered in waterproof fabric.

Design and tradition

For those who appreciate natural materials and love a minimal, essential, no-frills design. The workmanship is artisanal with skilful attention to every detail.

Land and sea

Mediterranean atmospheres in the colors and shapes: sandy dunes, little seafront piazzas and the tamarisk trees swaying in the breeze.

Choose,
imagine, **try!**

Our Sample Kit

TEPORIA

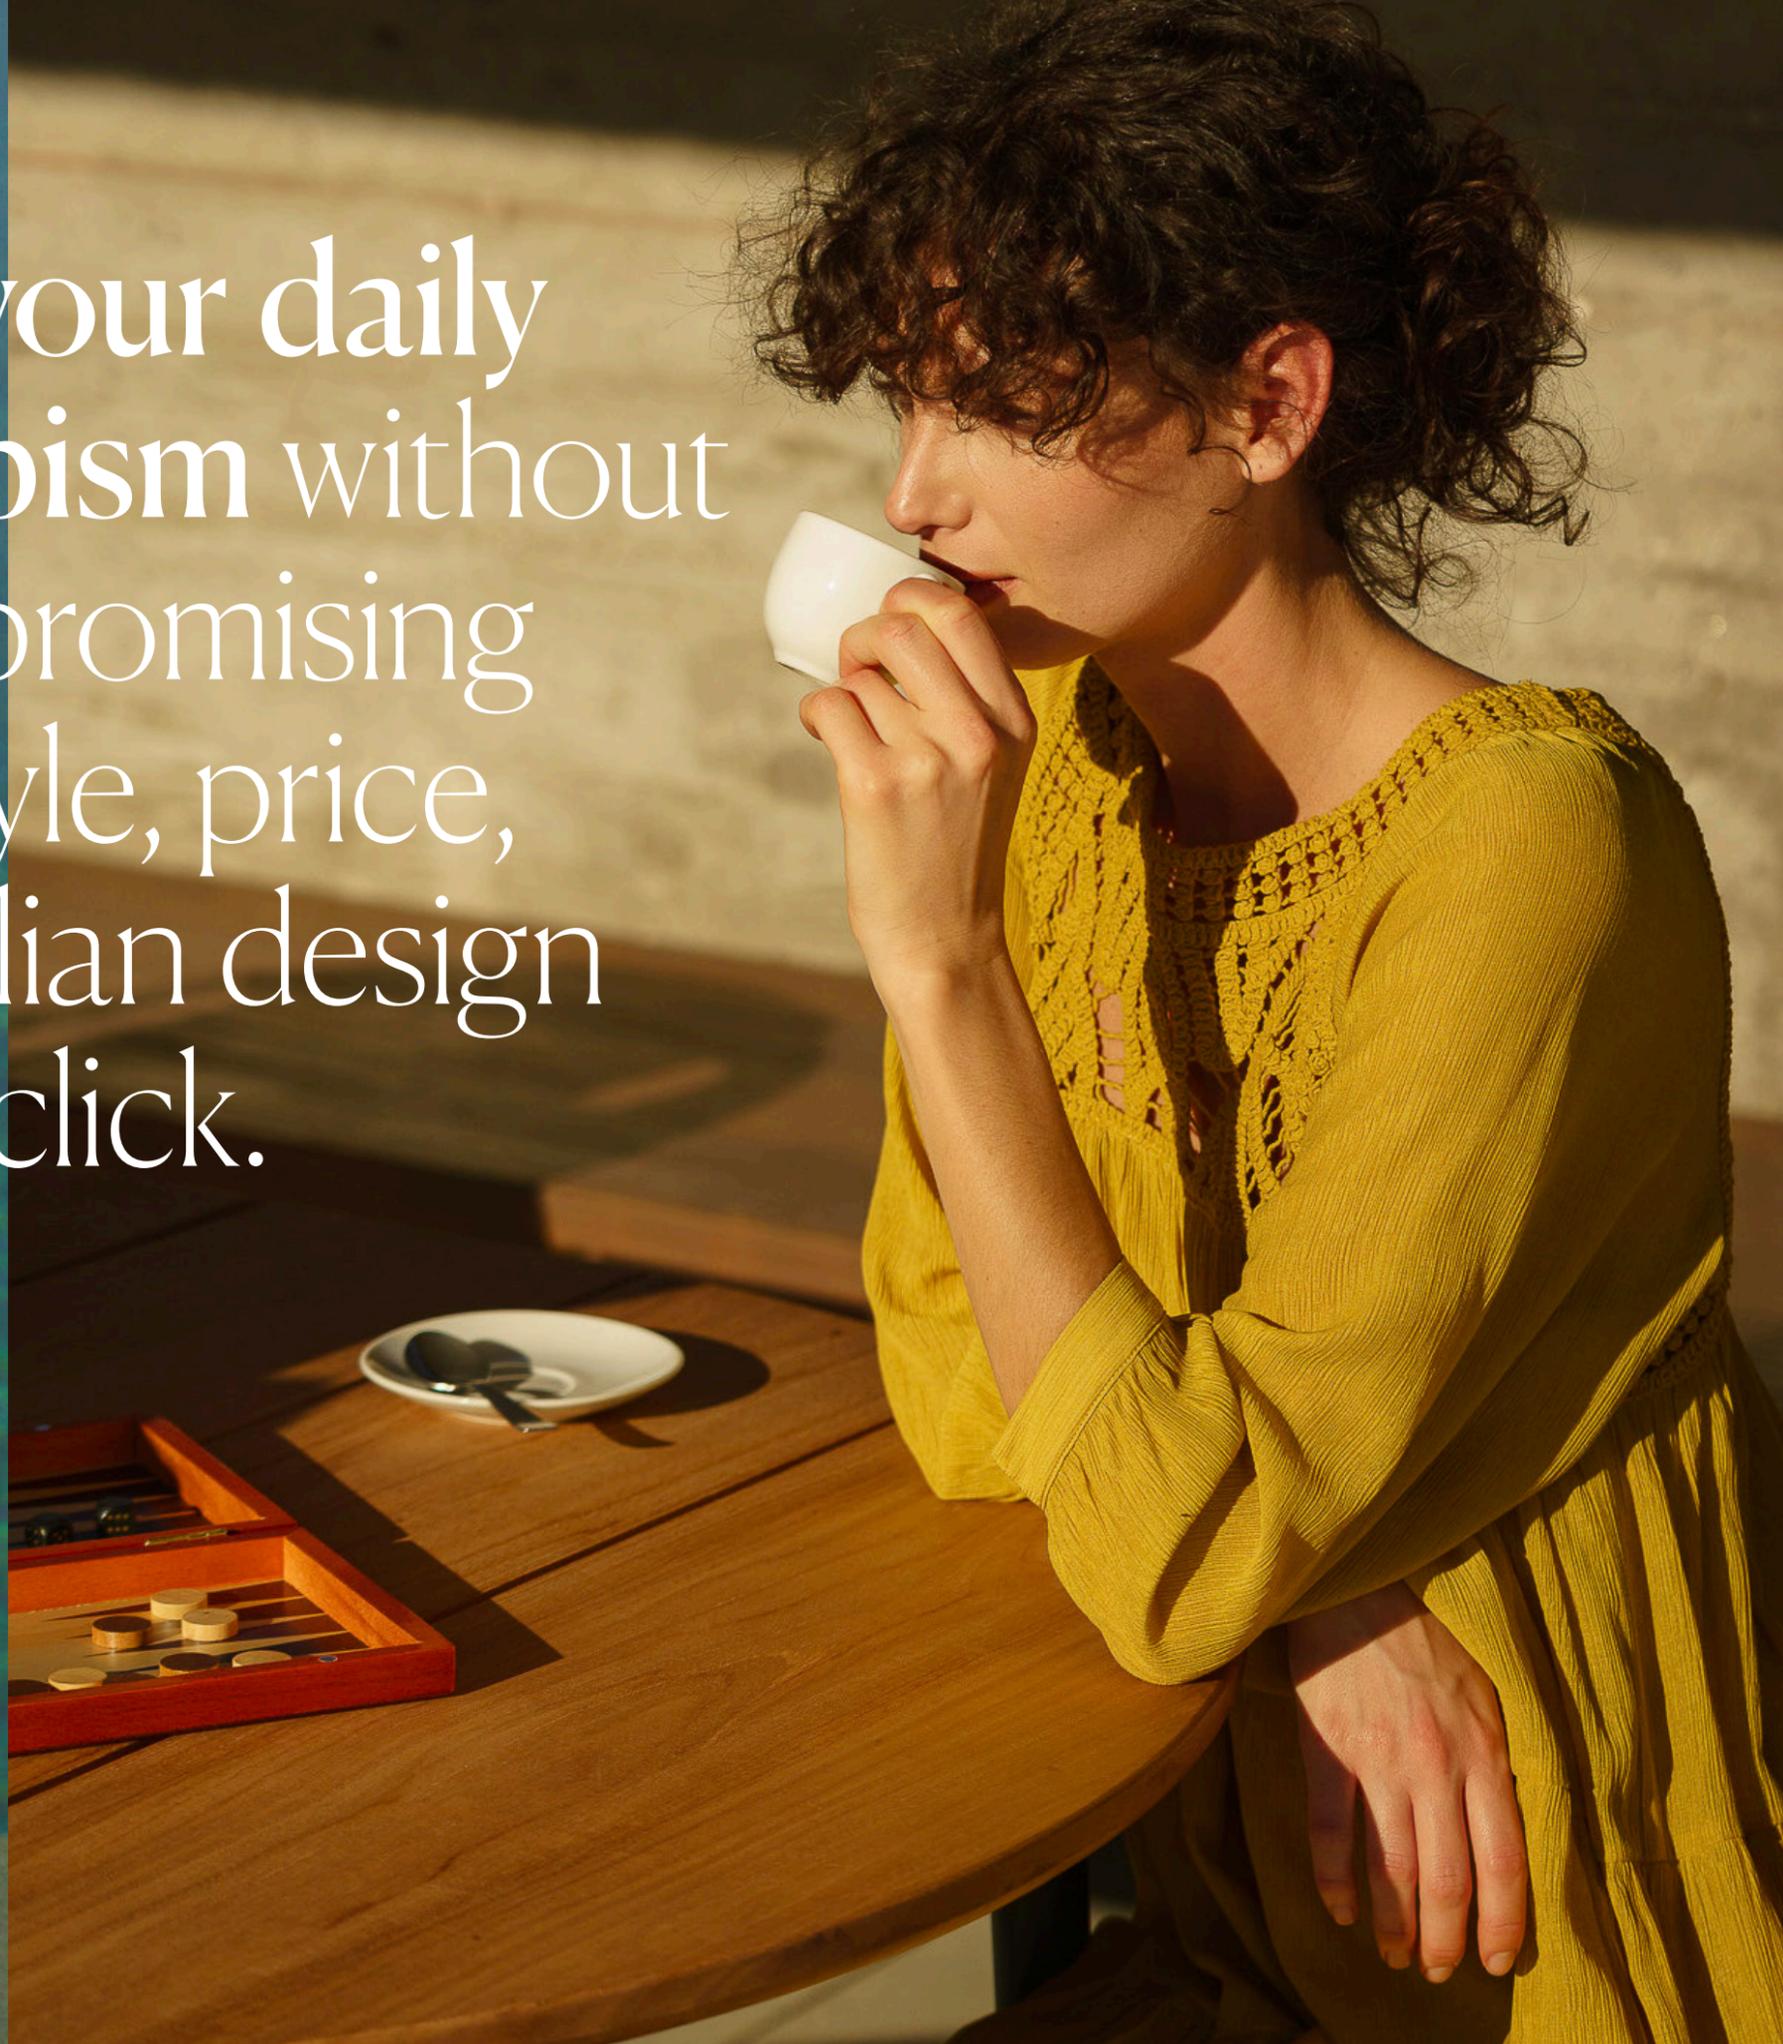

Buying furniture online takes much longer than buying a book or a box of vitamins. Our service makes everything simpler, more reliable and faster.

Are you trying to imagine a product in your outdoor space? **Our Sample Kit can help you.**

Get your daily escapism without compromising on style, price, or Italian design - in a click.
